

Bio Ethanol Fireplaces

... real sence of fire

BioNova
by Nova Vizantija

Easy to use

Having your own fireplace ? - never been easier – no need for chimney, gas, electricity or any other utility connection. You can install it or move it across your space – with our fireplaces and burners - can be installed where you want it – not dependent of any other connection. Independent fireplaces can be moved from room to room or from space to space hassle free.

Our burners and fireplaces come with all necessary accessories you need to operate it successfully. Unlike traditional wood fireplaces our burners and fireplaces are easy to clean and maintain. Simply fill the burner with proper fuel and turn it on then turn it off whenever you like - that is all !

Our burners have unique, beautiful natural flame without mess of traditional open fire. Nova fuel burns clean and with no smell. Only products of burning Nova fuel are CO₂ (carbon dioxide) and H₂O (water vapor).

When you turn it off there is no ashes to dispose, nothing to clean...

Safe to use

Bio nova burners and fireplaces are brought to you in compliance with the standard that covers specifically burners running on denatured bio ethanol - DIN 4734-1. This German standard presents set of rules that bring safety to every product that we produce for your enjoyment.

All our products are made from hi quality materials and with introduced ISO 9001:2008 standards of quality maintaining. That is the reason we can offer you 24 months warranty.

All our fireplaces coming with detailed instructions and if you follow it you will enjoy our products in safety for many years.

Effective and efficient, environmentally

No dangerous emissions – Nova fuel is renewable and clean burning liquid fuel derived from agricultural and forestry products. Only products of burning this fuel are CO₂ (carbon dioxide), H₂O (water in vapor) and heat.

Bio nova burners are 90% efficient – this is the main advantage – there is no chimney, so heat does not escape - it is all there in your space.

Flame from our burners is beautiful and natural without all the hassle with traditional fires, also, this brings a touch of magic in every space...

Nova fuel

Bio nova burners are running on special ethanol based fuel derived from plants.

It is a renewable and environmentally friendly source of energy. While it is burning it produces no smoke, no smell and leaves no ashes.

Co₂ (carbon dioxide), H₂O (water in vapor) and heat are only products of burning.

Designing

It is very easy to design and create fire feature in interior or exterior if you are not restricted by vents, cables, gas lines or any kind of utility connection. With Bio Nova you have perfect tool to create any fire design with remarkable simplicity and effectiveness. We are here to accommodate you with a solution for your design masterpiece.

Converting

You have a traditional wood or gas fireplace and you do not use it because it is too much trouble to service it (bringing wood, getting rid of ashes, cleaning chimney...), you can, with Bio Nova get all the benefits from natural fire in your fireplace. It is just as easy as to unwrap it, put it in to your existing fireplace and enjoy it without all the hassle.

Decorating and Furnishing

Decorating and furnishing your space with fire is very exciting. With Bio Nova you can choose from decorative wall piece to stunning center piece adding warmth to your space in classic or modern way. They do not just look great they really heat it up. For your project demands our team of designers, architects and engineers will be glad to service your needs for custom made fire objects. Let us complement your interior or exterior design with a flavor of passion for fire.
